EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or reasonably suggest the limitations of independent claims 1, 7, and 8, wherein the unknown word dictionary includes a general purpose branch, an attribute branch, and a loop branch, wherein unknown words are repeatedly processed through the general purpose branch a predetermined number of times after going through the loop branch.

Generally, it is known for speech recognition to provide an unknown word dictionary, so that out-of-vocabulary words are rejected instead of being erroneously recognized as one of the words in a standard dictionary database. However, Applicants' invention is directed to recognizing unknown words from word roots, prefixes, and suffixes, and classifying them by part of speech, where the suffixes or prefixes are attributes that provide an indication of the part of speech, e.g. –ing, -ed, -tion, or -ive. Applicants' Specification, Pages 23 to 24: Figure 4, discloses that an acoustic score is calculated until it becomes large enough by iteratively passing through the general purpose branch a predetermined number of times, passing through a loop branch, and passing through the attribute branch. The Specification, Pages 12 to 14, discloses an objective of reducing degradation of speech recognition accuracy when an erroneous recognition of an unknown word causes adjacent words to be erroneously recognized, too. The prior art of record does not disclose or reasonably suggest

iteratively traversing a general purpose branch, a loop branch, and an attribute branch to improve recognition accuracy of words in an unknown word dictionary.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
